PROFESSIONAL EXPERIENCE

FMC Research Solutions Inc.

Mandaluyong, PH

Junior Software Developer

Dec 2025 – Present

- Led development of HRIS and inventory/asset management systems, implementing features from requirements through deployment and maintenance, reducing operational effort by ~80% through workflow automation and system integration.
- Developed client-facing web-based demonstration platforms to support stakeholder engagements, enabling clear visualization of system capabilities and workflows.
- Engineered ASP.NET integration with high-security printing SDKs, implementing ID data mapping and API orchestration to support secure card personalization workflows.
- Contributed to the development of a compliance-driven SaaS platform for regulated asset distribution by building backend services using FastAPI within a distributed system architecture.
- Managed Docker / Podman-based deployments and maintained Ubuntu production servers via Webmin for system administration, supporting application hosting and operational workflows.
- Led technical guidance for interns through code reviews, task decomposition, and hands-on support within an Agile development environment.

Software Developer Intern

Aug 2025 – Nov 2025

- Built scalable frontend components using Next.js and the Material UI.
- Developed and maintained backend services and RESTful APIs using Laravel .
- Tested and validated API endpoints using Postman to ensure proper functionality.
- Applied Git-based version control practices using Bitbucket and Fork.

Lamina Studios, LLC

Spokane, WA, USA (Remote)

Full Stack Developer Intern

Aug 2024 – Sep 2024

- Contributed to a full-stack web application following MVC architecture.
- Built responsive frontend components using Vue.js and Tailwind CSS.
- Developed backend services with Laravel and PostgreSQL to support scalable features.

EDUCATION BACKGROUND

Polytechnic University of the Philippines

Manila, PH

Frontend Development: React, Next.js, Vue.js

Databases: PostgreSQL, MySQL, Redis, MongoDB, Supabase

Search & Messaging: Elasticsearch, RabbitMQ

DevOps: Docker, Podman, Webmin, Vercel,

Version Control: Git (Fork, Github, Bitbucket, Gitlab)

Systems: MacOS, Linux (Ubuntu), Windows

RELEVANT PROJECTS

TAKLUBAN | Filipino Native Language Profane Detector *(Thesis)*

Manila, PH

Lead Developer

May 2024 – Feb 2025

- Led the development of the algorithm to detect profane language in Tagalog, Cebuano, and Bikolano using a combination of a Filipino Native Language Identifier (FNLI), Part-of-Speech tagging, and N-gram analysis.
- Achieved 85.5% accuracy in profanity detection across supported languages by utilizing linguistic pattern analysis and language filtering techniques.

W.AIS (Personal Project)

Manila, PH

Full Stack Web Developer

Jul 2025 – Aug 2025

- Developed a finance-focused AI web application using Next.js with Gemini API that analyzes budget plans, manages transactions, sends alerts, and provides actionable insights.
- Integrated Clerk for secure user authentication and Supabase for database and backend services.

CERTIFICATION

- **FastAPI – Complete Course** (Udemy)
- **.NET Core MVC [.NET8]** (Udemy)
